Experience

BCN eMotorsport

Perception Engineer | Sep 2025 - Present

- Designed a telemetry processing engine using Polars and Parquet to evaluate Autonomous Vehicle perception algorithms, integrating automated Ground Truth generation and a continuous spatial metric tuning framework to eliminate manual benchmarking.

Minsait, Indra

Senior Data Consultant | Jul 2025 - Sep 2025

- Designed and led the migration of a legacy Master Data Management (MDM) system to a real-time event-driven model using Scala and MongoDB, significantly enhancing operational efficiency, system reliability, and user autonomy, and reducing data synchronization latency by 90%.

Data Engineer Consultant | Jul 2024 - Jul 2025

- Optimized the execution time and reliability of a critical Spark pipeline responsible for aggregating and publishing multi-source data by identifying and resolving bottlenecks in massive queries.

Analyst | Jul 2022 - Jul 2024

- Scaled a Document Management System handling over 500,000 daily requests by designing and enabling a dedicated service for large document downloads.
- Deployed ELK stack monitoring solutions to track system performance, proactively identifying and resolving operational inefficiencies.
- Engineered and maintained robust ETL pipelines utilizing Spark, MongoDB, and Hadoop

Software Engineering Intern | Nov 2021 - Jul 2022

- Designed and implemented RESTful APIs using the Spring framework.
- Managed CI/CD pipelines and containerized development environments utilizing Jenkins and Docker.

Reby

Undergraduate Researcher | Nov 2021 - Jul 2022

- Collaborated within an international team to engineer technical solutions for mapping urban air pollution via a fleet of electric scooters.
- Trained and deployed Machine Learning models to calibrate low-cost IoT CO2/NO2 sensors installed on scooters against historical base-station data.

Education

Universitat Politècnica de Catalunya (UPC ETSETB) | Feb 2025 - Present

Master in Advanced Telecommunication Technologies, specializing in Deep Learning

Universitat Politècnica de Catalunya (UPC ETSETB) | Sep 2018 - Jul 2022

Bachelor's Degree in Telecommunications Technologies and Services Engineering, specializing in Telematic Systems

International Cooperation

AUCOOP (University Association for Cooperation) | Feb 2025 - Present

- Led a comprehensive digital transformation and connectivity project for the St John of God Hospital in Yassa, Cameroon. This included the implementation and deployment of a Hospital Management System and the design and implementation of a local network ensuring robust, hospital-wide connectivity.

Skills

Programming Languages: Java, Python, Go, C++

Data & ML: Pandas, NumPy, Sklearn, PyTorch, Spark, Hadoop

Infra & Tools: Docker, Jenkins, Kafka, MongoDB, Kudu, ROS

Languages: Spanish (Native), English (B2), Catalan (Native)
